💼 Professional Experience

Varzeshsoft   09/2022 – present | Tehran, Iran
React Developer (Junior)

Working With a Big Team That Interacts With Real Customers and Communication About Product With Professional Technical Support Is a Great Experience That I Gain. This Project Contains Two Sections, The Admin Panel And The NextJs Application That Customers Can Use. The Admin Panel Uses ReactJs and Material UI, I Also Learned And Used ReactQuery For The First Time In This Admin Panel. For Application, I Use NextJs Which Allows Us to Create SSR Apps With Great SEO and UX, Also Work With PWA In This NextJs Application

Some Facts About Varzeshsoft: Varzeshsoft Is a CRM That Allows You To Manage Your Gym. Varzeshsoft Allow You to Work With Locker That Uses In Sport Gym, Also You Can Manage Your Users, Orders, Transactions, You Have Some Reports About Functionality

Polygony   04/2022 – 09/2022 | Tehran, Iran
React Developer (Junior)

Working on 3dily Products as a React Developer Is the Greatest Experience That I Have Ever Seen. In 3dily We Are 5 Developers.2 Backend Developer and 3 Frontend Developer. In This Project, We Use React, Material UI, and Typescript. In This Project, I Have a Big Challenge About Creating a File Manager That Allows You To Upload Multiple Expensive Files.

Some Facts About 3dily: 3dily is a 3D CRM Website That Allows Customers To See All The 3D Models That The Artist Created And Generate Some Pictures With Custom Shadows, Custom Scenes, And Custom Variants Based On Those 3D Models And Download Them. Also Allows Customers To Check Product Status And Chat With Artists And Managers.

White World   10/2021 – 03/2022 | Tehran, Iran
React Developer (Junior)

The Second Company That I Worked For It Is White World Had a Single Product Called Bazdidan And Joined This Company To Help Improve The User Interface And Performance Of the Product. In This Project, We Work With React But Do Not Use Any UI Component Or Utilities. We Create Anything Pure That Had Very Hard Challenge For US. We Use Context API And UseReducer Hook Pattern For Global State management. I Also Work With SocketIO For The First Time To Implement a Chat System And Notification System. Also, I Work WIth UseCallback And UseMemo For Some Performance Optimization.

Some Note About Bazdidan: Bazdidan Is a New Way Of Dealing Home. In Bazdidan You Can See Your Favorite House Or Find a House That Matches Your institution and Connect to Saleman

Polygony   06/2021 – 10/2021 | Tehran, Iran
React Developer (Junior)

I Join This Company As Junior Developer of React. We are 3 React Developer That Work With Each Other. In This Project We Spent Lots of Time In Working With Different Libraries And Tools Like React, Material Ui And Typescript. Also I Learn About Team Work And Work Version Control Like Gitlab. I Have Challange About Consuming Api In React Because Some api didnt Ready. This Project Is About Digital Newsletter That Contains 20 Page That We Implement The User Interface Of The Pages By Material ui. For Authentication Service We Use JWT Credentials.

Some Note About Dibarg: Dibarg Is New Way Of Reading Newsletter That Contain Catalog. Dibarg Is Digital Newsletter And Catelog That Can Use In Different Industry
